Note regarding Historical CRIS Reports:

The historical data contained within this emissions report was third-party verified outside the context of The Climate Registry's program. The Registry makes historical emissions reports available to the public to assist its Members in transparently providing a more complete emissions profile; however, due to the differences in reporting requirements and quantification methodologies, data initially reported to other programs or self-reported may be presented differently in historical reports and historical emissions may not be appropriate for use in statistical analysis or trending. If you have questions about historical data please e-mail info@theclimateregistry.org.
